Type:	Lambro & Olona 8mm Over Bath Screens
Code:	S10003 S10004
Version/Date:	v2 08/19

S10003

S10004

It is important to remember that water will find it's way naturally. This is a physical law that we cannot change. Our frameless bath screens are designed as a deflector for water to try and reduce the chance of water escaping from the showering area over a bath during normal showering conditions.

A frameless bath screen has a hinged mechanism, and a seal that sits directly on the rim of the bath. When water is allowed to infiltrate or is directly aimed at the hinge and seal, there is a possibility that water will pass through this area and escape from the showering area of the bath. The chance of water escaping, under normal showering conditions, is reduced due to the majority of the water hitting the person showering and only spray and splashes of water actually hit the screen itself. This does not render the item faulty, but is a characteristic of this nature of product.

Information:
Height: 150cm
Reversible design

Phoenix provide, as standard, a surface protection for all our shower enclosures clearly marked with the logo called Phoenix Easy-Clean. This is an invisible coating applied during the manufacturing process that helps ensure your shower maintains a 'new' look for as long as possible, by providing a barrier against the surface deposits that can dull the surface of your shower door.

Finishes:

Glass

Guarantee/Aftercare: During installation extra care must be taken to avoid damaging the fittings. We provide a guarantee against faulty manufacture or materials (excluding serviceable parts), providing they have been installed, cared for and used in accordance with our instructions and good plumbing practice.
